Alternate sources of energy and energy conservation measures

Alternate sources of energy and energy conservation measures

The college uses alternative sources of energy. The facility of LED lamps/bulbs helps considerably for energy conservation. The infrastructure of the college itself is Eco-friendly and we have utilized different strategies for the maximum utilization of natural energy resources and thereby, help energy conservation. The structure of the college is designed in such a way that a lot of natural light shall be filtered through it. The sliding windows with transparent glasses naturally reflect the sunlight and also make the building airy and fresh. The spacious Reading Room of the library also follows the same structure that avails a lot of light inside the Room helping for energy conservation.

Degradable and Non-Degradable Waste Management

The college follows a systematic process for the disposal of degradable and non-degradable waste. Degradable waste is stored in the dustbins that are kept in every department and wherever it is necessary. Every morning the human resources appointed for the total cleaning of the campus collect the degradable waste from the dustbins and dispose of it to the municipal corporation. Every day the vehicle of Nashik Municipal Corporation visits the college campus to collect all the garbage to dispose it of in a suitable manner.

On a college campus, the drainage system has been implemented for liquid waste management. Drainage systems which include all of the piping within College premises that conveys sewage, rainwater, and other liquid waste to a point of disposal. The main purpose of a drainage system is to collect and remove waste matter systematically and to dispose of wastewater as quickly as possible and should prevent gases from sewers.

In a commitment to environmental sustainability, our college has established a partnership with Era Green E-waste Recycling Private Limited to responsibly dispose of and recycle unused computers. This collaboration aligns with our institution's dedication to minimizing electronic waste and contributing to a cleaner, healthier environment.

1. Solid Waste Management :

Solid waste management is the process of collecting and treating solid wastes. On the college campus, we have placed three types of dustbins to dispose of solid waste. Blue color dustbin has been used for plastic waste, red color dustbin has been used for organic waste and black color dustbin has been used for paper waste.

Green Campus and Environmental Policy

Panchavati College of Management and Computer Science is dedicated to building a sustainable and environmentally responsible campus. The purpose of the Green Campus Initiative is to encourage positive behavior change, promote environmental protection and contribute to a greener future for everyone.

1. Students and faculty on campus are expected to use bicycles at maximum times.
2. All faculty, staff, and students are required to park their vehicles only in designated parking spaces outside the building.
3. The College holds a "No Vehicle Day" every year (once per semester) to spread the message of environmental protection.
4. Completely remove single-use plastics from campus, especially water bottles and packaged food and containers.
5. Plastic flex /banners may not be used for advertising, publications, or promotional materials for seminars, conferences, workshops or other programs. Such notifications must be made only through digital media.
6. Make the most of your LED bulbs and fluorescent tubes.
7. Develop and maintain maximum land to fill with green plants.
8. Encouraging students to adopt eco-friendly strategies for college festivals.
9. Do not encourage unnecessary printing of documents or other materials and to reduce the consumption of printing paper.
10. Appropriate water handling is in place. Water-saving habits are encouraged on campus.
11. Avoid purchasing disposable items at all costs.
12. Issue clear, easy-to-follow instructions to employees in the form of dos and don'ts.
